

AVIGILON FOR ALLY

STREAMLINE SECURITY INCIDENT MANAGEMENT THROUGH INTEGRATED VIDEO

When managing the security of your facility, engaging employees or welcoming visitors, you do not have time to access multiple programs to do your job. Simplify your security operations with one, easy-to-use platform. Ally allows your team to manage incident records and video, communicate instantly across devices, and make proactive planning decisions.

KEY FEATURE

ACC video alarms triggered in Ally can be accepted as a call for service and users can create an incident with option to view the video clip.

INTEGRATED VIDEO FOR ENHANCED WORKFLOWS

Efficiently manage incidents in one streamlined workflow by integrating your Avigilon Access Control into Ally's security workflow. Your team may currently monitor video alarms but manually manage incidents separately, causing inefficiencies in your current workflow. Now, alarms triggered in Ally through integration with Avigilon can be viewed quickly and pushed into a dispatch workflow with just the touch of a button, saving your team time.

ALLY IS A FULL-FEATURED STANDALONE INCIDENT MANAGEMENT SOLUTION FOR SECURITY OPERATIONS THAT IS AVAILABLE WITH AN AVIGILON CAMERA INTEGRATION.

OTHER ALLY BENEFITS

ENHANCED INCIDENT MANAGEMENT

Streamline the way your operation responds to and manages an incident. Our integrated, cloud-based platform allows incident information to be captured across multiple devices and shared in real time throughout your organization.

INSTANT COMMUNICATIONS

Connect your team with fast, secure, and reliable voice communication and information sharing across two-way radios, WAVE two-way radios, smartphones and workstations. Easily communicate critical information to pre-defined contacts via text, text-to-speech or email.

IMPROVED INSIGHTS

Enhance decision-making through embedded analytics, incident records, and reports for fast trend analysis, proactive security planning, and reduced liability.

EASY TO LEARN. EASY TO USE. EASY TO ACCESS.

Train employees in less than an hour with a user-friendly design that's easy to navigate, even for those with little or no software experience. Capture, search, and report incident data from any device with an internet connection.
