

AIR Series AI dash cameras

The **AIR series AI dash cam** uses artificial intelligence to make your fleet safer. It watches for distracted driving in Real-Time and only alerts managers to the serious events. It coaches your drivers on the road and lets you track your vehicles' locations instantly. It's a smarter way to protect your drivers and your business.

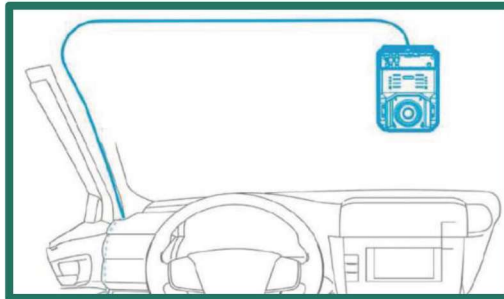

KEY FEATURES

- Advanced Driver Assistance Systems (ADAS)
- Driver Management System (DMS)
- Live Real-Time coaching
- All-In-One Solution combining Video AI and Telematics
- Plug-and-Play, no calibrating
- Unlimited live Look-ins
- Expandable: add up to two additional external cameras
- Edge AI-Safety

Real-Time Live Look-ins

Real-Time check-ins, unlimited live access and coaching across your fleet.

Easy Installation

All-in-one solution requires no calibration. Plug-and-Play makes setup a breeze. Easily expandable: Additional plug-in monitoring cameras available.

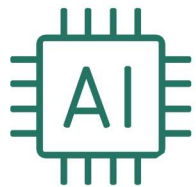

One Device - One Service Plan

Combining AI, Video and Telematics into one monthly plan. No linking accounts or calibrating devices. The features you need in one single monthly plan.

AIR Series AI dash cameras

Smarter Protection. Sharper Insight. Safer Journeys.

Manage Maintenance

Smarter Protection. Sharper Insight. Safer Journeys.

The AIR Series AI Dash Cam combines advanced vision technology with intelligent driver monitoring to deliver unmatched safety, awareness, and peace of mind. Designed for modern drivers and fleet professionals alike, it continuously analyzes both the road ahead and driver behavior to help prevent accidents before they happen—and protect you when they do.

KEY FEATURES

Dual AI Camera System

- Road-Facing Camera: Captures HD video with ADAS alerts for forward collision, tailgating, lane departure, stop sign violations, and more.
- Cabin-Facing Camera: Monitors driver behavior using DMS technology to detect distracted driving, phone use, and missing seat belts

Smart Incident Detection

- Automatically records harsh or aggressive driving, accidents, and potential incidents, even when parked.

Advanced ADAS Alerts

- Forward Collision Warning
- Tailgating Detection
- Lane Departure Alert
- Stop Sign Violation
- Harsh & Aggressive Driving Detection
- Accident & Potential Incident Alerts
- Parked Vehicle Hit Recording

Driver Monitoring (DMS)

- Distracted Driver Detection
- Phone Usage Alerts
- Seat Belt Compliance

Seamless Connectivity

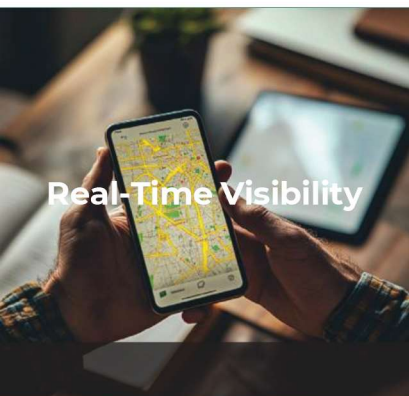

- Real-Time data uploads and event notifications (available with telematics integration).

Scalable Design

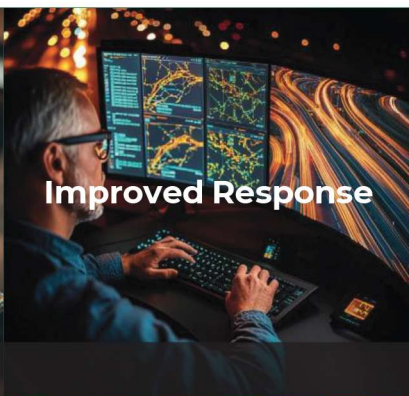

- Optional cameras for monitoring in and around your vehicle — the Air II supports up to two additional cameras, for a total of four.

Why Choose AIR Series

Empowered by AI and precision engineering, the **AIR Series** helps drivers stay focused and fleets stay protected. Whether you're preventing collisions or documenting critical events, AIR sees what matters most—on the road and in the cabin.

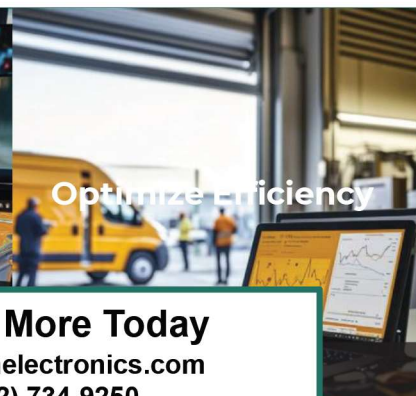

Real-Time Visibility

Improved Response

Driver Safety

Optimize Efficiency
